

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application. Please cancel claims 2, 6, and 12-15. Please amend claims 1, 3-5, and 18 as follows.

Listing of Claims

1. (Currently Amended) An industrial truck, comprising:
a radiator;
a cooling air line;
a filter device located in the ~~vicinity~~ flow path of the cooling air line, the filter device including a stationary screen non-removably integrated into the cooling air line; and
a cleaning device effectively connected with the screen integrated into the cooling air line,

wherein the cleaning device includes a wiper configured to be moved in a non-rotary path along an outside surface of the screen, wherein the wiper is fastened to a lever arm that is connected with a manual lever such that the lever arm can be manually actuated from outside the cooling air line.

2. (Canceled)

3. (Currently Amended) The industrial truck as claimed in claim [[2]] 1, wherein the ~~drive means are~~ manual lever is located outside the cooling air line.

4. (Currently Amended) The industrial truck as claimed in claim [[2]] 1, wherein the wiper is realized in the form of a brush.

5. (Currently Amended) The industrial truck as claimed in claim [[2]] 1, wherein the lever arm is a parallel arm.

6. (Canceled)

7. (Original) The industrial truck as claimed in claim 1, wherein the cooling air line includes a connecting device for a vacuum cleaner.

8. (Original) The industrial truck as claimed in claim 8, including a tube connected with the connecting device and having at least one opening that is located underneath the screen.

9. (Original) The industrial truck as claimed in claim 3, wherein the wiper is realized in the form of a brush.

10. (Original) The industrial truck as claimed in claim 3, wherein the lever arm is a parallel arm.

11. (Original) The industrial truck as claimed in claim 4, wherein the lever arm is a parallel arm.

12-15. (Canceled)

16. (Original) The industrial truck as claimed in claim 3, wherein the cooling air line includes a connecting device for a vacuum cleaner.

17. (Original) The industrial truck as claimed in claim 4, wherein the cooling air line includes a connecting device for a vacuum cleaner.

18. (Currently Amended) An industrial truck, comprising:
a radiator;
a cooling air line;
a stationary filter screen non-removably installed in the cooling air line; and
a cleaning device operatively connected to the filter screen, the cleaning device comprising:

a wiper configured to contact a surface of the filter screen to remove material from the filter screen while the filter screen is inside the cooling air line,

wherein the wiper is connected to a lever arm connected to a manual lever such that the lever arm can be manually actuated from outside of the cooling air line.

19. (Original) The industrial truck as claimed in claim 18, further including a vacuum connecting device connected to the cooling air line.

20. (Original) The industrial truck as claimed in claim 19, including a tube positioned under the filter screen and in flow communication with the connecting device such that material removed from the screen can fall into the tube and be removed from the cooling air line through the vacuum connecting device.
